

COMFORTABLE INDOOR CLIMATE

COMFORTABLE INDOOR CLIMATE

MISSION

Breathe.
See.
Feel.
Experience.
Relax.
Feel good.

Take care of the truly important things in life. The CIC module takes care of the climate.

MISSION

FEEL GOOD AT HOME

The oldest finds of the genus homo, the human race, are 2.5 million years old. Back then caves provided protection against wind and weather. As the population grew, and thanks to craftsmanship, we built houses to protect ourselves. We sealed ourselves off hermetically from the environment. Dust, pollen and poor air are the consequences. These factors impair our health and quality of life. Perhaps it is time to rethink how we understand our living spaces.

» TOGETHER, WE CAN CREATE
A PLEASANT INDOOR CLIMATE. «

With our modern research and many years of development work, we are now able to ensure the essential feel-good parameters for a healthy climate. We have combined this know-how in the user-friendly CIC module.

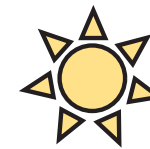

MISSION

FEEL-GOOD PARAMETERS

Your comfort in focus.

Temperature

Luminosity

Humidity

Air Quality

Security

Convenient Operation

VISION

We want to do our bit to make living and working spaces more liveable again.

Our product is a quiet and hidden module that delivers an optimal indoor climate, well-being and security.

VISION

ENJOY A NEW LIFESTYLE

*Light-drenched rooms
with a healthy climate.*

We spend most of our lives in artificial living spaces which we equip with a controllable climate. By controlling all the feel-good parameters, we create a whole new dimension to the quality of life. A luxury that everyone can afford. With our product, we want to positively influence the private and professional life of humankind. This will lead to greater creativity, performance and vitality in living, working and recreational spaces. Our aim is to be able to enjoy all the benefits of nature at home as well. And to give a little back to nature, we also pay attention to the careful use of resources in the production process. This is precisely what we have also allowed to flow into the intelligent software that independently regulates the indoor climate: heating or cooling only take place when actually needed. In turn, this has a positive effect on ongoing energy costs without having to sacrifice any comfort. Enjoy the new attitude to life in harmony with nature.

VISION

BENEFITS AT A GLANCE

1 Only one product can cool, heat, light and ventilate your living spaces. Plug'n'play. A healthy indoor climate is just three steps away.

2 The system is controlled by an app on your smartphone. This means you have control over your feel-good climate and can adjust the temperature, humidity, CO₂ level and light to suit your personal preferences.

3 Our app is your mobile weather station for when you're on the go. You can also monitor and conveniently control the outdoor and indoor climate of your home while on holiday.

4 We can integrate the functions of all your home's systems into our app: alarm system, window shutters, heating and much more besides.

OUR PROMISE TO YOU

*The Comfortable Indoor Climate module
delivers a comfortable atmosphere
to your single-family home.*

HOW IT WORKS

» INNOVATIVE TECHNOLOGY
FOR YOUR COMFORT. «

ANYTIME, ANYWHERE

*The CIC Comfort app lets you control your
feel-good climate when you're on the go.*

Once the app is installed, several users can be created and given access to the module. Each room can be individually controlled, entirely to suit the wishes of the individual family members. Garage doors, surveillance cameras and other functions in your house can also be controlled using the CIC Comfort app or an existing voice assistant. If you already have a smart home system, the CIC module can be easily added to it.

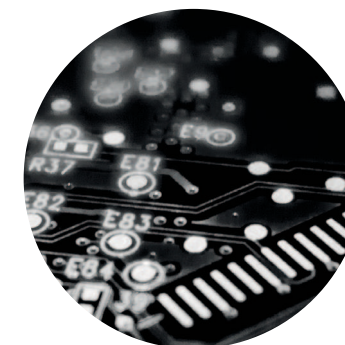

HOW IT WORKS

3 STEPS TO A HEALTHY CLIMATE

*Innovative technology
for your home.*

The module is supplied fully assembled and is mounted on a flat roof using a ceiling outlet.

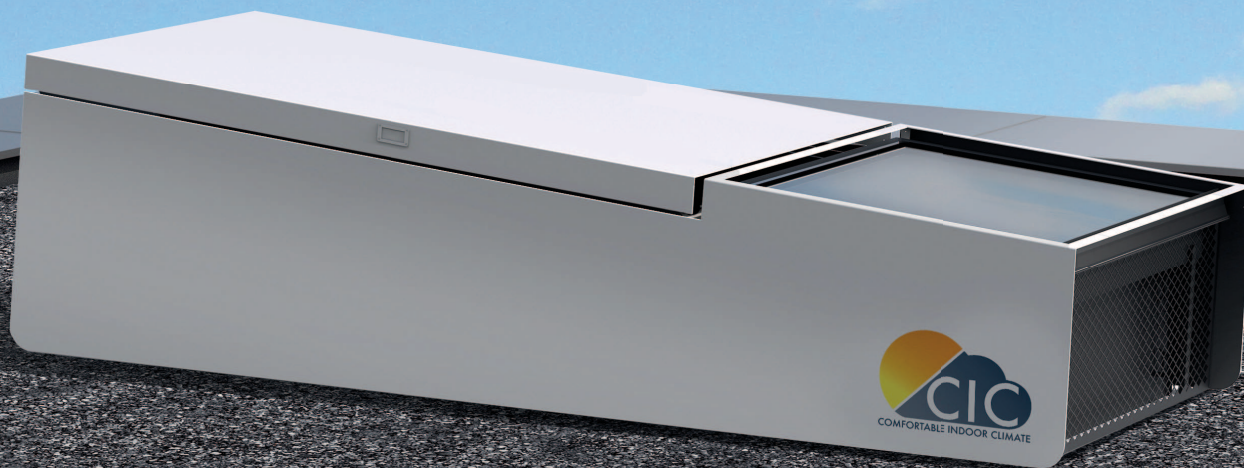

The indoor sensor unit is attached and connected to the internet.

Install the app, log in and enjoy comfort and convenience to the fullest.
